- Unipetrol results are consolidated in PKN ORLEN's financial statements Q2'05 and 1H'05, dated September 29th, 2005; for the period from June 2005.
- Due to the large number of acquired assets and liabilities PKN ORLEN is currently still engaged in the process of their valuation to determine fair value. PKN ORLEN has recognised the preliminary impact of the valuation of the acquired net property, plant and equipment (see slide 4)².
- The net asset value of Unipetrol attributed to PKN ORLEN has a preliminary estimate of PLN 3 811 m.
- The price adjustment mechanism is in its final stage (see slide 4)³.

August 16th, 2005 – condensed preliminary consolidated financial statement

- Results of the acquisition of 62.99% Unipetrol shares were reflected in preliminary condensed financial statement as of August 16th, 2005 financial assets line for the initial purchase price equal to PLN 1.6 bln.

2) PKN ORLEN recognized a preliminary effect of the valuation of the acquired net property, plant and equipment except for the assets of Česka Rafinerska. The lack of Česka Rafinerska valuation resulted from the limitation of access to the relevant data since, according to the Česka Rafinerska's Company Act, financial data may only be made available to shareholders upon a resolution of General Shareholder's Meeting. PKN Orlen was granted limited access to the relevant data which prevented conducting the valuation process according to the schedule set afore.

However, such statements must not be understood as the Company's assurances or projections concerning future expected results of the Company or companies of the ORLEN Group. The Company is delivering financial description of the Group prepared based on the information available and the best of the Management Board's knowledge, with the proviso that it was not feasible to deliver complete information on the consolidated financial statements with the elements of non-consolidated financial statements for the second quarter of 2005 on initially required date, that is by August 16th, 2005, because the process of valuation of the acquired assets of Unipetrol Holding a.s. ("Unipetrol") is time-consuming and complex. For this reason we moved the publication of PKN ORLEN's consolidated financial statement for Q2 2005 from 16th August 2005 to 29th September 2005. PKN ORLEN has received appropriate approval for the change of date from Polish Securities Exchange Commission. The Group recognised a preliminary effect of the valuation of the acquired net property, plant and equipment except for the assets of Česka Rafinerska. The lack of Česka Rafinerska valuation resulted from the limitation of access to the relevant data since, according to the Česka Rafinerska's Company Act, financial data may only be made available to shareholders upon a resolution of General Shareholder's Meeting. PKN Orlen was granted with a limited access to the relevant data which disabled conducting of valuation process according to the schedule set aforesaid.
